Electric Storage Heaters

Warm Up to Good Times

After a long day at work, there's nothing like an invigorating hot shower. The use of hot water, when readily available, is so versatile and fits beautifully with the lifestyle you want.

Meru Electric Storage Heaters are designed to supply constant hot water throughout the whole house. With it, you can enjoy perfect hot water in the kitchen, bathroom and for general washing.

Why Homeowners Choose Meru?

Constant Temperature

A steady flow of hot water with no cold water surprises.

Economical to Run

The storage tank is insulated with pressure injected CFC-free polyurethane foam to keep water hot for longer periods.

Flexible Installation

With Meru's slim storage unit, it can be easily installed on the ceiling, wall or on the floor.

Durable Quality

The inner tank is designed with special high-grade stainless steel to last.

Safe and Secure

Be assured with a built-in safety valve to protect against power surges.

Central or Individual Heating

You can choose to install Meru as a centralised heating system or a separate function driven heating according to location of use in your home.
